KENKO KC-AF11 Compact Camera White

>> Classic digital camera with a retro look and deliberately simple operating concept
>> 5 megapixel CMOS sensor (12MP interpolated)
>> Lightweight and compact, approx. 101 g, 8x digital zoom, USB connection
>> Photos and videos, 2.4 inch IPS display, integrated LED light
>> Autofocus, close focusing distance approx. 20 cm, electronic image stabilization

The KC-AF11 is a compact digital camera in the classic Kenko style, deliberately reminiscent of the era of early digital photography. It is aimed at anyone who is looking for an uncomplicated approach to photography and appreciates the characteristic look of classic digital cameras far removed from over-optimized smartphone image processing. With its handy, lightweight body, the KC-AF11 fits easily into any pocket and is always ready for action. The 5-megapixel CMOS sensor in combination with the fast f2.0 lens and the wide-angle focal length of 33.8 mm ensures an authentic, slightly nostalgic image style. Thanks to autofocus, a close focusing distance of approx. 20 cm and electronic image stabilization, spontaneous snapshots as well as simple detail shots are possible. In addition to taking photos, the camera also records videos and can be used as a webcam on a PC if required. An integrated LED light, self-timer, 8x digital zoom and various white balance modes make it versatile for everyday use. The 2.4 inch IPS display enables clear image control with simple operation. The KC-AF11 combines retro character with modern functionality and is ideal for anyone who wants to experience photography consciously, simply and with a classic digital look.
